About us

CyberContract is a niche player organising specialised services around the theme of "CYBER protection".

It was effectively founded mid-2014, as the logical outcome of a thorough run-up initiated more than a year previously. A run-up in which the driving forces behind CyberContract examined this new phenomenon in close collaboration with various professionals using a 360° approach.

This unique contact with local specialists from various disciplines (ICT professionals, lawyers, insurance brokers, niche insurers, etc.) formed the basis of the eventual start of CyberContract mid-2014, and the unique mix of specialised services we offer today.

In Belgium, CyberContract has one business centre in Turnhout and one in Kontich.

Your company is a target

Cyber Risks

You're already at risk right now
The public cloud is no safe haven
Your private cloud is no safe haven
Your local infrastructure is no safe haven

A company is only as strong as its reputation

Be prepared

Companies usually have a lot of procedures and plans relating to their offline risks, such as an annual evacuation exercise to limit the consequences of a fire.

But what about your online business? Is your company prepared for a cyber incident? Do you have a conclusive departure policy? Does your business culture pay enough attention to employees' cyber risk-awareness?

Get everyone involved! Create a Cyber crisis plan!

PREVENTION

CyberContract offers companies access to a unique set of specialised services with local professionals!

Services of proven quality... rapid and centrally accessible. This way, we assist you very specifically in elaborating a prevention plan concerning cyber incidents. After all, prevention is always the first step!

We have strong partners for the following preventive services, among others:

PEOPLE AWARENESS

INFRASTRUCTURE AUDIT

NETWORK AUDIT
